

INSTALLING IPTV BOUQUETS ONTO ZGEMMA BOX – WITHOUT IPTV PLAYER

ON Zgemma box you need to find the IP address:

- Go to menu, system, information, network and make a note of the IP address

Google 'PUTTY' or click the link below

<http://www.chiark.greenend.org.uk/~sgtatham/putty/download.html>

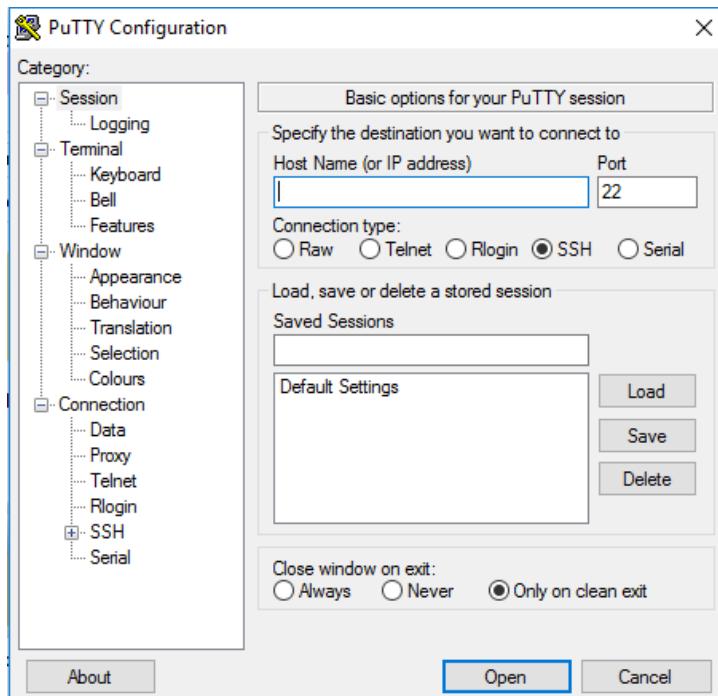

Select this version if using windows:

For Windows on Intel x86

PuTTY: [putty.exe](#)

Find PUTTY in your download folder

Open PUTTY and type in your IP address of Zgemma into the HOST name (or IP address) box

You will now see the screen below:

Type root and press enter

The copy the line I sent you

Go back to putty, right click and press enter

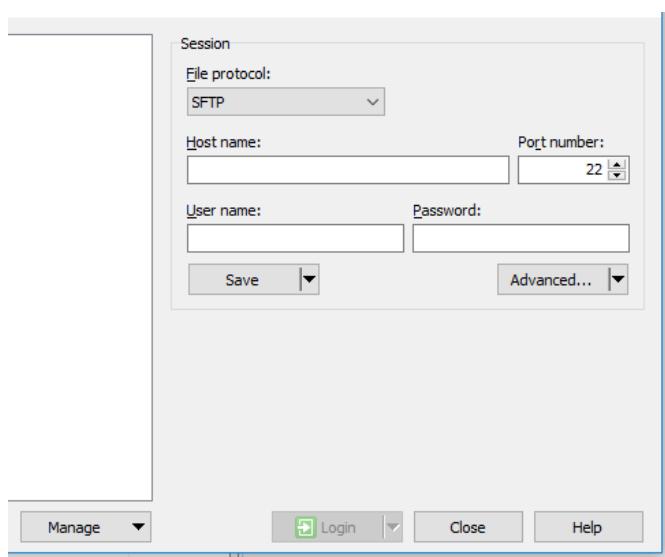

This will create your new BOUQUET called MY_BOUQUET where your channels will be

ADDING M3U FILE TO IPTV PLAYER ON ZGEMMA WITH IPTV PLAYER

Save the file I email to you onto your desktop

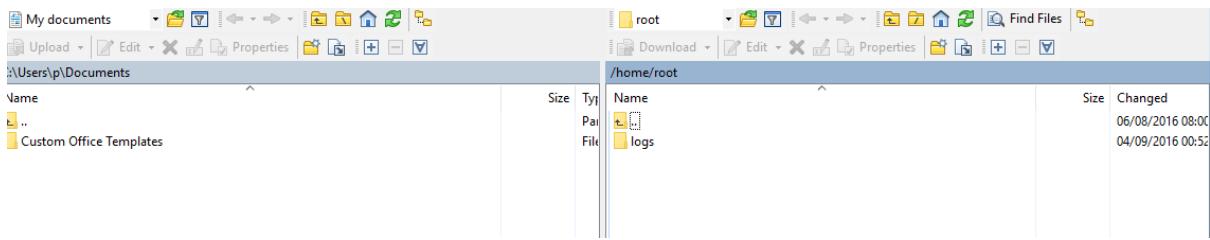

Download a program called 'WINSCP' - <https://winscp.net/eng/index.php>

Open WIN SCP

In host name type in the IP address of your Zgemma

Username type in root

On the right hand side box double click the 3 dots

Repeat above

Double click 'HDD'

Double click 'ipabiptyv'

On the left hand side box, find the playlist you were sent you on your desktop

Right click on it

Click upload – once it says complete you have your M3U file on your Zgemma

Now go to your Zgemma remote

Press Menu, IPTV PLAYER,

Open Local Media

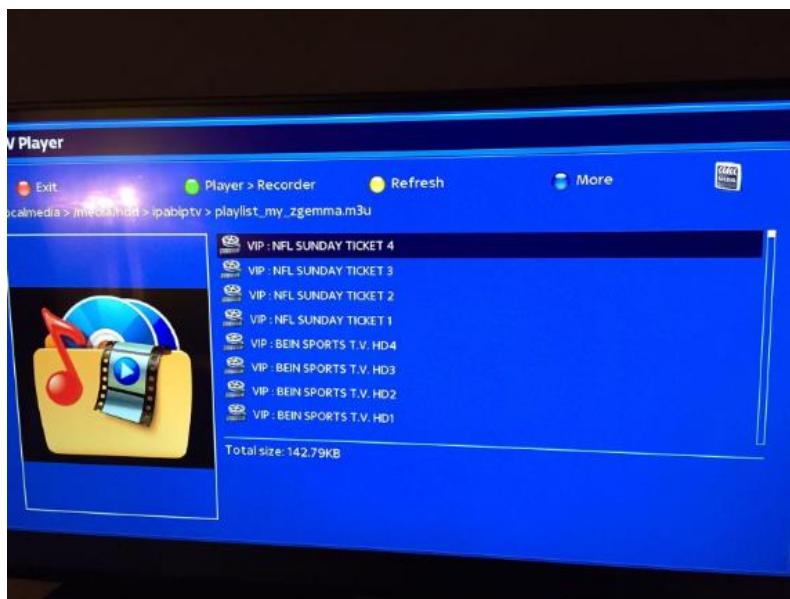

Then media/hdd, ipabiptyv

Click on your playlist and your channels will appear

Channels:
